Characteristic features

Patented terrace installation system that increases the durability of decking boards

Features of the accessory:

1. Dedicated screw for mounting DECK-DRY connectors in the gap between deck boards
2. Made of stainless steel
3. Possibility of installation in aluminum joists after pre-drilling

Application

Designed for raised deck terraces with wooden boards, where an elevated level of durability and resistance to rot is required.

Invisible board mounting from underneath - boards are not damaged by screws from the top.

Used for mounting DECK-DRY connectors with decking boards to joists and mounting WPC clips with boards to joists.

Advantages

Advantages of the accessory:

1. Durability
2. Versatility of application

Installation recommendations

Screws should be screwed in with the clutch on the cordless screwdriver set appropriately. For the installation of DECK-DRY connectors, use the dedicated T20 DEC-BIT20 bit. Installing screws into aluminum joists may require pre-drilling the joists.

Tools

Torx bit Drill bit 3.5 mm

Recommendations for use

Do not use de-icing salt. Salt can cause corrosion of metal structural elements (screws, clips, adjustable feet) and damage surfaces adjacent to the terrace.
