Series.

SPIRAL

STANDARD

MAX

1A. CLIP INSTALLATION - SIDE

1B. CLIP INSTALLATION - CORNER

2A. GLUE / ADHESIVE INSTALLATION - SIDE

2B. GLUE / ADHESIVE INSTALLATION - CORNER

1. CLIP INSTALLATION

Clip installation - permanent fixing with visible black color clips. Use closure plate with clips side and upper clip.

2. GLUE / ADHESIVE INSTALLATION

Glue / Adhesive installation - fast solution without visible clips on the exterior part. Use closure plate with glue side part. We recommend 3M™ Polyurethane Adhesive Sealant 550 Fast Cure or any with comparable performance.

ON THE TOP AND BOTTOM

Side finishing closure plate is placed on the pedestal top and bottom. Each connection of the closure plate and terrace tiles we recommend to use glue / adhesive. We recommend 3M™ Polyurethane Adhesive Sealant 550 Fast Cure or any with comparable performance.

GAP SPACE 3 / 5 MM (1/8" / 3/16")

Gap space between tiles can have a 3 / 5 mm (1/8" / 3/16") width depend on closure plate side used.

UPPER CLIP

Upper clip is used when clip installation is chosen. Insert clip into to top part of closure plate. Clip prevent sliding last tile.

PLUG

Plug is used to connect side finishing closure plate with SPIRAL pedestals. It is used on the top and bottom of the pedestal.
